Academic record

Language skills English: fluent in writing and reading, conversational in listening and speaking
Deutsch: beginner at writing, reading, listening and speaking
Chinese: first language

Research interests Multi-wavelength continuum (from infrared to submm) and line observations on ISM (HII region, PNe, clumps), radio continuum and Radio recombination lines of HII regions, outflows in clumps, masers in PNe. Massive star formation.

I'm proficient in observation, data processing and analysis of interferometer (e.g., VLA, ALMA) and single dish (APEX, Effelsberg, and IRAM), using software of CASA, Obit, and GILDAS, and compute language of python, C, and R.
